Collaborator

```
{
  "Title": "Enhance Documentation for Using OpenAI API with Python",
  "Body": "The current documentation for using the OpenAI API with Python lacks detailed examples, especially around advanced use cases like streaming completions and error handling during API calls. This enhancement aims to add more comprehensive Python code examples for different API features, including error handling scenarios and streaming data. Additionally, it will include a section on common issues faced by developers when integrating the API and how to troubleshoot them effectively. Improving this documentation will provide a smoother experience for new and advanced users, reducing time spent on support queries."
}
```
