Collaborator

Description: The goal of this issue is to document and implement best practices for quality assurance in AI, with a focus on GPT-based models. This would include discussing risk management strategies, data quality protocols, ethical considerations, and testing methodologies tailored for AI applications. Additionally, this enhancement would integrate frameworks that are compatible with the React environment to ensure high-quality output from AI models.

Proposed Enhancements:

Establish QA Frameworks: Implement standard QA frameworks adapted for AI applications.
Risk Management and Testing Protocols: Define risk management strategies and develop testing protocols specific to GPT model behaviors and performance metrics.
Ethics and Data Quality Controls: Develop guidelines for ensuring data quality and ethical AI use.
Continuous Monitoring: Outline processes for maintaining and monitoring AI quality over time.
